PAPER NO. WRWA **882**WESTERN RIVERSIDE WASTE AUTHORITY

MEETING	15 th July 2019
REPORT AUTHOR/DATE	General Manager (Contact Mark Broxup - Tel. 020 8871 2788) 5 th July 2019
SUBJECT	Report outlining progress with operations and other matters since the previous meeting of the Authority.
CONTENTS	Page 1 Executive Summary Pages 1 to 20 Items reported on Page 20 Recommendations Pages 21 – 31 Appendix A - Performance Monitoring Graphs Page 32 Appendix B – RWR Communications Plan 2019/20
STATUS	Open
BACKGROUND PAPERS	None

EXECUTIVE SUMMARY

- 1. This paper brings Members up to date on operational and other matters which, in themselves, do not warrant production of a separate paper. The majority of these matters are for Members' information, but where approval is sought this is referred to in the report. The specific matters covered in this report are:
 - a) Operations
 - b) Performance Monitoring
 - c) Waste Minimisation and Recycling Communications
 - d) Kensington and Chelsea's Food Waste Trial (South Area) Composition Results 2018
 - e) Authority-wide Waste Composition Results
 - f) Proposed Procurement for Authority Advice, Support and Services
 - g) Draft Joint Waste Policy Document
 - h) Constituent Council New Recycling Initiatives
 - i) Cory's Proposed Riverside Energy Park
 - j) Members Visit
 - k) Authority Office Refurbishment
 - I) Items costing between £5,000 and £30,000

OPERATIONS

Transfer Stations/ Materials Recycling Facility (MRF)

2. There has been no major disruption in service to the main Transfer Stations' operations since the last Authority meeting.

Fire at Smugglers Way MRF

3. On 1st May 2019, at approximately 08.55, a fire was discovered in a baler feed chute in the Materials Recycling Facility (MRF) when paper was being fed into the baler. The site was evacuated and the London Fire Brigade (LFB) attended, with three pump units and 15 staff, and dealt with the fire quickly. LFB gave the all-clear at 11:00, however they agreed to keep one pump on site whilst the clear up took place. There were no injuries to personnel, but there was slight damage to equipment due to water ingress from the sprinkler system and hose reels. The site clean-up was completed by MRF staff and normal operations started from 14:00. All Borough vehicles were diverted to Cringle Dock while the fire was being

dealt with. The LFB carried out an investigation which concluded that the likely cause was a lithium battery in the paper stream.

Fire at Cringle Dock Transfer Station

- 4. On 7th June 2019, at 12:20, a fire was discovered in a tipping bay at the Cringle Dock Transfer Station. The site was evacuated safely, surrounding properties were notified as per agreed procedures and the fire services were on site within ten minutes. The fire was brought under control swiftly, but the fire continued to smoulder for six hours. The site remained closed until 09:00 on 8th June 2019, when the London Fire Brigade (LFB) gave the all-clear. Borough vehicles were diverted to Smugglers Way and the contingency arrangements were put in place for a complete closure at Cringle Dock. These arrangements included extending the opening hours at Smugglers Way until 22:00 and opening at 06:00 on Saturday morning. Arrangements were also put in place for night time vehicles to deliver to the City of London's Walbrook Wharf Transfer Station, between 22:00 and 06:00.
- 5. Preliminary investigations revealed that the fire may have been caused by an exploding gas bottle. An email was subsequently sent to all Borough collection contractors and Technical Officers, requesting that they remind their staff to be vigilant when collecting gas bottles and to ensure that they are not disposed of with general waste, but handed over to Transfer Station staff. At the time of writing a full investigation is underway.

Site Incident and Evacuation at Smugglers Way

6. On 26th June 2019, a military grade "smoke" hand-grenade was found on a pre-sort conveyor belt in the MRF, at approximately 10:30 am. The police were alerted and they advised that the site should be evacuated immediately. All the Borough collection vehicles were diverted to Cringle Dock. The Police, the LFB and the Bomb Squad attended Smugglers Way, removed the grenade and gave the all-clear at 11:40 am. There was no trace of where the grenade came from and no other devices were found.

Belvedere – Energy from Waste Facility

7. At the Authority meeting on 21st November 2018, it was reported that, on 10th October 2018, an undefined power disruption occurred at the Belvedere facility that resulted in damage to the turbine. Cory notified officers in January 2019 that the Turbine had been shipped to Germany for repair and that it was unlikely to be fully operational until July 2019. However, following commissioning, the turbine

- and generator became fully operational again on 29th May 2019, producing electricity for export to the National Grid.
- 8. On 24^h May 2019, the Environment Agency issued a variation to the Environmental Permit for the Belvedere Energy from Waste Facility that changed how the Emission Limit Value (ELV) for carbon monoxide is reported, from the half hour average ELV to the ten minute average ELV. The daily average remains the same and must not exceed 50 mg/m3. The new ELV is effective from 1st January 2019.

PERFORMANCE MONITORING

<u>Introduction</u>

- 9. Detailed performance monitoring is shown in Appendix A to this report. The tables shown set out:
 - a. the tonnages of each waste type (including co-mingled recycling contamination) delivered by each constituent council in the current financial year to date, together with projected outturn tonnages, compared against those budgeted for and the previous financial year's outturn;
 - b. the projected annual cost for each commodity, compared to what these would be if the Authority's budgeted tonnage of each commodity was received;
 - c. forecast tonnages for future years, adjusted simply by the number of working days in each year; the major waste type and co-mingled contamination tonnages are also shown on a monthly as well as an annual basis;
 - d. comparisons of the tonnage of each major waste type handled by each constituent council on an annual basis;
 - e. comparisons by borough of the tonnages of Local Authority Collected Waste (LACW), household and non-household waste, household waste arisings per dwelling and per person; and
 - f. weight-based recycling performance on a household and LACW basis.

Points to Highlight

- 10. Whilst General Waste (the residual waste that cannot be reused or recycled and is sent for energy recovery) accounts for around 76% of the delivered waste stream, it accounts for almost 93% of the Authority's waste disposal costs after allowing for the treatment of the contamination within the co-mingled recycling. By comparison co-mingled recycling represents 18% of the delivered tonnage, but only accounts for 4% of the Authority's costs.
- 11. The outturn figure for General Waste for 2018/19 was 1.1% less when compared to 2017/18. The outturn figure 2018/19 for Co-Mingled material was 0.6% less than 2017/18.
- 12. From tonnage data to date we are predicting a 3.14% reduction in total waste handled by the Authority in 2019/20 from that budgeted for and a 3.98% reduction in General Waste. However, these predictions are only based on the actual tonnage up until 31st May 2019. The levels of reductions in General Waste vary across the constituent councils, with Hammersmith & Fulham at 4.6%, Kensington and Chelsea at 4.0%, Lambeth at 3.8% and Wandsworth predicted at 3.1%.
- 13. The General Waste for 2019/20 at the Household Waste and Recycling Centre is currently forecast to be 6.2% below that predicted in the budget. However, these figures are likely to change over the year as there is a great deal of seasonality in the HWRC figures.
- 14. The predicted tonnage of co-mingled recycling collected by Hammersmith & Fulham is currently down by less than 1%, Kensington and Chelsea is currently forecast to be down by 1.8 %, Lambeth is down by 1.6% and Wandsworth is down by 3.7% on the predicted forecast for 2019/20.

RECYCLE WESTERN RIVERSIDE (RWR) 2019/20 AND SCHOOLS PROGRAMME

End of the Line for Waste – Waste Minimisation Campaign

15. The 'End of the Line for Waste' campaign, which launched in October 2018, is a waste minimisation campaign that centres on the reduction of food waste, single-use plastics and garden waste. The campaign was designed by Envirocomms, who also provide the staff for the public events. The following initiatives have been carried out since launch;

Public Events

A total of 16 public events have taken place and enabled meaningful engagements with a total of 3,788 people. A meaningful engagement is determined as a conversation lasting more than two minutes, where the person was provided with an information leaflet and branded water bottle. Wandsworth yielded the highest number of total engagements at 1,410. This may have been due to the Southside Shopping Centre location, an indoor location with use of an Kensington and Chelsea yielded the least number of engagement pod. engagements at 682. This was due to adverse weather, which affected the events. Hammersmith & Fulham yielded 844 engagements (320 are attributed to the 'Flashmob Event' as detailed at the last Authority meeting in Paper No. WRWA 873) and Lambeth yielded 852 engagements. Kensington and Chelsea and Lambeth had interactions with a higher number of non-residents that impacted on the total number of meaningful engagements with residents in these boroughs. Further public events are planned in July and August 2019, and it is proposed to ask the Borough officers to explore new sites that are either inside or under cover locations and where a higher "resident" footfall is likely.

SKY TV Advertising

Two TV adverts were produced; one for Single-Use Plastic and the other for Food Waste. The adverts were first aired during week commencing 3rd June 2019. There was a delay in the Adverts being aired, due to the extended scrutiny applied to the content by ClearCast; the UK's verification agency for advertising. An example of the level of scrutiny applied to the content was the use of a food waste statistic in the campaign that was derived from the Government's Waste and Recycling Action programme (WRAP) that could not be used as WRAP could not provide evidence that it was factually correct. The adverts will be shown for four weeks and the outputs are pre-determined. A total of 85,279 targeted viewers will see the adverts an average of seven times, meaning that the adverts will be viewed 596,953 times during the broadcast period. These adverts will be broadcast to the target group – 18 to 44 year olds resident in the Western Riverside area.

Website (endofthelineforwaste.org)

The website was created to act as a reference 'hub' for residents to visit to find out more information. Between 1st October 2018 and 17th May 2019, 642 people visited the site a total of 1,684 times. 12.5% of users returned to the site more than once in the same period with each visit lasting an average of 2.1 minutes.

53.5% of these visitors arrived at the site directly (typing the URL into their browser), 23% arrived via Social Media, 13% via a search, with the remainder being referred via other sites. 61% of visitors were between the ages of 18 and 34, 15.5% were between the ages of 35-44, 49% were female, 51% male. 60% of users accessed the site via a desktop device, 40% using a mobile device. The most popular content during this period was Composting (and Compost Bins) and 'Know your Food Dates'.

Social Media

Facebook, Instagram and Twitter were used, Facebook being the primary platform with content migrated to others. During the period up to 17th March 2019, social media visibility (the number of people who would have seen content on social media once) was 166,153. Facebook has achieved 248 followers. The Food Waste video was viewed 5,398 times, attracting three comments and two shares. 84.3% of viewers were male, 15.7% were female. The age group representing the most viewers was between 25 and 34. The second most dominant age group was the 18-24s.

The single-use plastic video was viewed 6,899 times, attracting two comments and one share. 82.2% of viewers were women and 17.8% were men. The age group representing the most viewers was between 25 and 34. The second most dominant age group was the 35-44 year olds. The most popular 'organic' (unpromoted) post was one showing peeled Oranges in plastic packaging posted on 11th March 2019, achieving a reach of 503 and 55 shares. The most effective promoted post was for the plastic video on 22nd November 2019. This achieved a reach of over 14,000 with 258 post interactions.

However, Twitter and Instagram underperformed when compared to Facebook and Envirocomms believe that this was due to the cross-population of posts across all platforms with the same content that proved not to be as efficient as was projected. This was because the content tended to be weighted towards Facebook. Going forward, innovative posts will be designed to fit both Twitter and Instagram better.

Bus Advertising

In March 2019, 220 adverts were displayed on the side or rear of buses that travel through the Authority's area and the estimated "Reach" (the number of people who saw the message at least once) is 550,000 adults across the

- Authority's area. This estimate is made by the company that sell the advertising space.
- 16. Overall, the campaign to date has been successful in reaching the targeted audience and EnviroComms estimate that 80% of the target group have seen the campaign message.
- 17. The most important output of the campaign will be a reduction in the targeted waste groups which will be measured at the end of this financial year, when the campaign will have been running for 18 months. It will be hard to measure a direct connection with the campaign, other than looking at the overall tonnage, but it is planned to carry out a short survey at the 12-month anniversary of the campaign, asking the residents that agree to be on the Authority's email list how the campaign had affected their efforts to minimise waste. At the last Authority meeting, Members approved the continuation of the 'End of the Line for Waste' campaign and Appendix B to this report details the communications plan for 'End of the Line for Waste' for the remainder of this financial year.

What Happens to Your Recycling – A Recycling Campaign

- 18. At the last Authority meeting Members also approved the launch of a new campaign that provides reassurance to residents that the materials they put out for recycling collection are actually being recycled. Appendix B attached to this report details a communications plan for the 'What Happens to your Recycling' campaign. Some delay has resulted due to prolonged consultation with the boroughs on the look of the campaign, but progress has been made as follows:
 - Following a procurement exercise Chocolate Films, a video production company based in Battersea, were selected to produce two short videos; one to support RWR communications and the second to support the Schools programme. The RWR video will follow the story of household recycling, from collection through to what products are made into following the recycling process, and the household waste stream through river transportation, electricity production and the recycling of the bottom ash. The problems with contamination will also be highlighted. The Schools video will be focussed at school children aged 5-11, with an emphasis on Reduce, Reuse and Recycling (the 3 R's).
 - A map showing where geographically in the UK and EU the materials are being sent for processing is currently being designed that will go on to the Authority's website.

 Adverts will be placed in various publications and at advertising sites as detailed on the communications plan, attached as Appendix B to this report.

SCHOOLS PROGRAMME

- 19. The Education Team has had another very busy year, with even more school tours and visits than the 2017/18 academic year.
- 20. This year the number of MRF tours for local residents, community groups and charities has also increased, with new Saturday morning tours and a regular monthly evening tour for individuals to sign up to. By the end of July we will have run 40 MRF tours for adults to see what happens to their waste and recycling and encourage them to become ambassadors in their own communities. 40 tours amounts to one per week, on average, over the school year.
- 21. The programme has been fully booked for the whole year and the Team have been successful in attracting new schools to the programme, with fifteen new primary schools taking part. The Team will, once again, be targeting new schools for the 2019/20 academic year.
- 22. The Team have worked with 82% of state primaries across the four boroughs since the programme began in 2013, ranging from 79% (67% last year) in Lambeth to 89% in RBKC (77% last year).
- 23. By the end of this school year 129 class visits will have taken place at Smugglers Way (up from 125 in the 2017/18 academic year), from 81 different schools.
- 24. By the end of July, the Team will have run over 400 workshops and assemblies in 77 schools (up from 304 workshops in the 2017/18 academic year). The most popular workshop this year has been Plastic Planet, which highlights the problems of single-use plastic and encourages children to make pledges to reduce their own consumption.
- 25. The Team will be continuing to offer the programme to all local schools and emphasising the actions that schools and individuals can take to reduce their waste, particularly food and single use plastics.

KENSINGTON AND CHELSEA'S FOOD WASTE TRIAL (SOUTH AREA) - COMPOSITION SURVEY RESULTS

- 26. The Royal Borough of Kensington and Chelsea introduced a food waste trial in the south of the Borough in March 2018 and the Authority took the opportunity to carry out compositional analysis of the waste generated in the trial area before and during the trial.
- 27. The purpose of the analysis was to test the theory that the introduction of food waste collections can have a positive effect on reducing waste generation and increasing dry recycling levels. The theory is that residents are more likely to focus on the waste they are producing and how best to manage it if they are focussed on separating their food waste.
- 28. Composition analysis was carried out in February, May and October 2018, and at the last Authority meeting Members approved that a fourth sample be carried out in February or March 2019, to test if the low weight in February 2018 was a seasonal variation or an anomaly. The results are presented in Table 1 below:

Table 1

	Kg/H			
With Garden Waste	Feb-18	May-18	Oct-18	Feb-19
Residual	4.39	5.77	5.76	4.03
Recycling	2.44	3.93	3.39	2.52
Food	N/A	1.23	0.83	0.64
Total	6.83	10.94	9.98	7.19

Fab 10	Oct-	Oct-	Feb-
Feb-18	May-18	18	19

36%	36%	34%	35%
N/A	11%	8%	9%
100%	100%	100%	100%

	Kg/H	Kg/Household/Week					
Without Garden Waste	Feb-18	May-18	Oct-18	Feb-19			
Residual	4.19	4.19	5.12	3.92			
Recycling	2.43	3.91	3.39	2.52			
Food	N/A	1.23	0.83	0.64			
Total	6.62	9.34	9.34	7.08			

Feb-18	May 10	Oct-	Feb-
L6D-19	May-18	18	19
63%	45%	55%	55%
37%	42%	36%	36%
N/A	13%	9%	9%
100%	100%	100%	100%

	Kg/H	
	Feb-18	Feb-19
Garden Waste	0.21	0.11

Fab 10	May 19	Oct-	Feb-
Feb-18	May-18	18	19
3%	15%	6%	1.5%

- 29. The fourth sample indicates that the low weight in February 2018 is likely to be a seasonal trend as the waste composition survey carried out in February 2019 produced comparable low tonnage results.
- 30. The pattern across the four surveys shows that, even if the Garden Waste tonnage is ignored, it is clear there is no evidence that there has been a decrease in waste generation or an increase in recycling. It is not proposed to carry out further composition surveys focused on this food waste trial. However, the results of the compositional surveys have been passed to Ricardo AEA to analyse, in conjunction with the work planned, as detailed in paragraph 48 of this report.

AUTHORITY WIDE WASTE COMPOSITION SURVEY RESULTS

- 31. At the Authority meeting on 6th February 2018 (Paper No. WRWA 850), Members approved the appointment of M.E.L to carry out a Waste Composition Survey across the Authority's area in October 2018. The survey would replicate the survey carried out on the low rise properties in October 2014 and, where possible, comparisons would be made between the two surveys.
- 32. The survey work commenced on 15th October 2018 for a period of two weeks and the sampling regime involved the direct collection and compositional analysis of waste from a target of 150 properties from each of the four Boroughs. 75 properties were surveyed twice in Kensington and Chelsea, where there are two collections per week.
- 33. The survey results report has been distributed to the Technical Officers and the full report can be made available to Members on request. The headline results are as follows:

Residual Waste

- Householders placed out an average of 9.4kg/hh/wk of residual waste.
- Food waste was the major component of residual waste, forming 35.2% of the total.
- Paper items made up 9.4% of the residual waste; 41% of this could have been recycled.

- Card and cardboard made up around 4.7% of collected residual waste; 75.3% of this could have been recycled.
- Plastics formed 13.1% of the residual waste; 30.8% of all plastic waste consisted of recyclable plastic bottles and containers.
- 2.2% of residual waste was metallic; 52% of this could have been recycled.
- 5.6% of residual waste was glass; 97% of this was glass bottles and jars which could have been recycled.
- 8.5% of residual bin contents were found to be compostable garden waste.
- 18.1% of collected residual waste could have been placed into the comingled recycling stream.
- 10% of collected residual waste could have been placed into the food recycling bins by those households which have this service the equivalent of 1.0kg/hh/wk.

Comingled Recycling

- All kerbside householders were setting out an average of 6.0kg/hh/wk of mixed recycling.
- Overall, 19.1% of all recycling waste collected from all properties was classified as contamination. This was equivalent to 1.1kg/hh/wk.
- 33% of contamination was due to general loose and bagged residual waste, including nappies and DIY materials; 19.5% was non-recyclable paper and card, with 23.5% being non-recyclable plastics and 9.5% food waste.
- Around 79% of recyclable paper and 78% of recyclable card was correctly captured.
- 71% of plastic bottles were recycled along with 47% of plastic containers.
- 58% of recyclable tins and cans were recycled, along with 75% of glass bottles and jars.

Food Waste

- Participating Lambeth residents set out 3.5kg/hh/wk of food recycling, with Kensington and Chelsea households with this service presenting 4.6kg/hh/wk.
- 1% of collected food waste was deemed contamination, with most being paper, card and plastics.
- 45% of Lambeth's food waste and 57% of Kensington and Chelsea's food waste was correctly captured using the supplied container.
- 34. The composition survey data is an essential tool that is used by the Authority and constituent councils to inform future waste and recycling initiatives. Currently, this survey is undertaken every four years during the same time of the year for comparison purposes, but it does not allow for seasonal variations that affect waste generation. If an Authority survey was carried out every 15 months this would incorporate seasonal differences, providing four seasonal variations over five years.
- 35. It is therefore recommended to commission an Authority-wide waste composition survey every 15 months, at an estimated cost of £16,000 per annum.

PROPOSED PROCUREMENT FOR AUTHORITY ADVICE, SUPPORT AND SERVICES

- 36. A number of contracts that provide advice, services and support to the Authority are due to expire during the current financial year 2019/20 and a number of services provided on an ad hoc basis also need to be reviewed. It is proposed to procure for the following services and expert advice by the end of March 2020.
 - <u>Legal Advice Non-commercial</u>

Guidance on matters relating to public and general law.

<u>Legal Advice – Commercial</u>

Guidance on matters associated with the Waste Management Services Agreement (WMSA).

Energy Auditing

An annual audit of the RRRL revenue energy share.

Engineering and Construction

Advice relating to complex engineering and construction issues related to the WMSA or other projects such as the Cringle Dock redevelopment.

Property Guidance

Advice concerning planning applications that may impact on the Authority's Transfer Stations, complex property matters relating to the WMSA, or other property related matters such as the redevelopment of Cringle Dock.

Financial Analysis

Advice relating to complex financial issues concerning the WMSA.

• Information and Technology (IT)

Provision of IT support for Authority staff, including the hosting of the remote server (cloud) and general support with the IT hardware. Support is also required for the maintenance of a specially designed database (software) such as the database that stores the tonnage data.

Property Valuations

Provision of property valuations

Insurance Guidance

Provision of advice relating to complex WMSA insurance issues.

Public Relations Advice

Provision of advice relating to media enquiries and investigations.

Requirements for Quotations and Tenders - Estimate of cost

37. The Authority's procurement code demands that the General Manager shall prepare a properly calculated written estimate of the cost prior to inviting tenders and quotations for works, supplies or services and shall calculate, where

appropriate, the estimated aggregate value in accordance with EU public procurement aggregation rules.

38. The General Manager's estimate shall form the basis for determining the appropriate procedures for competitive tenders and quotations to be obtained under this Code and shall also be used for subsequent evaluation purposes.

Thresholds and numbers of tenders and quotations to be invited

- 39. The following minimum number of invitations to tender or quote shall apply,
 - subject to EU procurement rules including aggregation.

Type of procurement and thresholds	Minimum number of invitations to tender or quote
(a) works, supplies and services estimated to cost less than £1,500	no requirement
(b) supplies and services estimated to cost £1,500 and above, but less than £5,000	3 oral quotations
(c) supplies and services estimated) to cost £5,000 and above, but less } than £25,000 }	3 written quotations
(d) works estimated to cost £1,500 and above but less than £25,000 }	
(e) works, supplies and services estimated to cost more than £25,000 to £181,302 (up to the EU threshold).	minimum of 4 tenders

Aggregate values may be calculated by one of the following methods:

- the estimated value of separate contracts for meeting a single requirement; or
- the total value of goods and services purchased during the last financial year; or

- the estimated total value of all contracts/orders expected to be placed in the next financial year, or during the term of the contract if that is longer; or where contracts have no definite duration, e.g. for a five year contract, 60 x the monthly value.
- 40. EU Public Contract Regulations were passed into UK law in 2015 and will remain in place unless or until they are repealed and replaced. When procuring goods or services over the financial threshold, a public authority must do so under these regulations and must advertise any requirement over the threshold limit for Supplies and Services, which is set at £181,302, in the Official Journal of the European Union (OJEU), rather than just advertising it nationally.
- 41. The Authority's Procurement code details exemptions as follows:

The General Manager, in consultation with the Clerk and Treasurer, may place orders of less than £25,000 without obtaining competitive quotations or tenders where the works, supplies or services are urgent and necessary:

- (a) for the protection of life, health or property; or
- (b) to maintain the functioning of a public service for which the Authority is responsible.

The General Manager, in consultation with the Clerk or Treasurer may also place orders of less than £25,000 for works, supplies or services without obtaining competitive quotations or tenders where:

- (a) the works, supplies or services must normally be entrusted to a utility undertaking, statutory undertaking, local authority or similar public body; or
- (b) the works, supplies or services are available from only one firm; or
- (c) the Authority has decided to extend the scope of an existing contract to include further works, supplies or services or to extend the duration of a term contract; or
- (d) the Authority has decided that special circumstances make it appropriate and desirable that a contract should be negotiated with a single firm.

- 42. It is proposed to establish contracts with a term of five years, with an option of extending for a further two years. Officers will seek tender submissions that provide "call off" services and obtain indexed fixed rates per hour, where appropriate.
- 43. The net spend for the services that will be covered under the proposed procurement process is detailed in Table 2 opposite which details the total spend in the preceding five years (to enable an aggregated estimate). This excludes any work relating to the Cringle Dock redevelopment project, as it is proposed to procure separately for this work as and when required. All of the services to be procured (with the exception of Commercial Legal Advice, which is discussed in paragraph 44. below) fall under the OJEU threshold limit for Supplies and Services of £181,302.
- 44. It is not proposed to procure for the Commercial Legal Advice, due to the specialist nature of the service provided that relates specifically to the Waste Management Services Agreement, and it is proposed to negotiate with the existing contractor as a single firm as described in paragraph 6(d) of the Authority's procurement code "that special circumstances make it appropriate and desirable that a contract should be negotiated with a single firm." The Public Contract Regulations 2015 introduced a Light Touch Regime (LTR) that includes legal services. The LTR rules are flexible on the types of award criteria that may be used, but make clear that certain considerations can be taken into account, including the need to ensure quality, continuity, accessibility, affordability availability and comprehensiveness of the services; this requires the Councils to advertise contracts with a lifetime value at or above €750,000 (currently £673,483). The estimated aggregated value for Commercial Legal Advice falls below this threshold at £369,763.

Advice, Services						Net

45. The Authority is recommended to approve the proposed procurement process for the services outlined above. Following the assessment of tenders and the selection process, officers will seek approval at future Authority meetings to appoint the chosen tenderer(s).

DRAFT JOINT WASTE POLICY DOCUMENT

46. At the Authority meeting on 19th September 2018 (Paper No. WRWA 863), it was agreed to delay the production of the draft Joint Waste Policy document until after the Government had published its Resource & Waste Strategy, the introduction of

the EU Circular Economy Package, Brexit impacts, and the potential introduction of a Deposit Return Scheme. It is now likely that the draft policy document will not be presented to the Authority until 2020, after the conclusion of the Government's consultation process has been published. Ricardo AEA, who were commissioned to draft the Strategy, will prepare a costs appraisal report that will assess the environmental and cost impact (burden funding) of introducing some of the proposals in the Government's strategy, namely the introduction of separate food and garden waste collections and the Deposit Return System.

47. In addition, officers have asked Ricardo AEA to prepare an environmental and financial cost appraisal report assessing the indicative environmental benefit and financial cost of introducing separate food and garden waste collections. It is expected that this work will inform the Authority and the constituent councils on the magnitude of any new burden funding they may need to seek to recover from Government.

CONSTITUENT COUNCIL NEW RECYCLING INITIATIVES

- 48. At the meeting of the Authority on 22nd September 2010 (Paper No. WRWA 669A) Members instructed the Clerk to write to each of the constituent councils to inform them that, in future, should they wish to make arrangements themselves to recycle any significant tonnage of waste then, in accordance with Section 48 of the Environment Protection Act 1990, they must, as soon as reasonably practicable, notify the Authority in writing. The Authority will then approve or object to any such proposal at its next available meeting. The Clerk wrote to the constituent councils, as instructed, on 27th October 2010.
- 49. The constituent councils have not notified the Authority of any new initiatives since the previous Authority meeting.

CORY'S PROPOSED RIVERSIDE ENERGY PARK

50. Cory's planning application for its proposed Riverside Energy Park at Belvedere in the London Borough of Bexley was accepted for examination by the Planning Inspectorate on 14th December 2018. The Planning Inspectorate held a four day examining open hearing, from 4th June to 7th June 2019, on Specific Issues and Compulsory Acquisition. An update on the proposed Riverside Energy Park can be found in Paper No. WRWA 885, elsewhere on the Agenda.

ANNUAL MEMBERS STRATEGY FORUM AND VISIT

- 51. At the Authority meeting on 28th September 2016 (Paper No. WRWA 813), it was agreed that the Annual Members Strategy Forum and Visit should be left as a rolling item until Members and Officers agree a hot topic for discussion.
- 52. A four year cycle of visits and special events was also discussed. The cycle is as follows:
 - a) EfW Visit 2018
 - b) MRF Visit 2019
 - c) Transfer Station Visit 2020
 - d) Hot Topic Presentation 2021
- 53. Member visits generally take place in the Autumn, usually October. Please can Members indicate at the meeting if they agree that a visit to the Smugglers Way MRF is desired and, if so, Members will be contacted to find a suitable date.
- 54. If Members wish to undertake visits before the allotted time above, this can be arranged by contacting the General Manager.

AUTHORITY OFFICE REFURBISHMENT

55. At the last Authority meeting Members agreed that refurbishment works to the Authority offices should be carried out. The works began during week commencing 20th May 2019 and officers decanted to accommodation elsewhere on the Smugglers Way site, which included a temporary Portacabin to house the Education team and their equipment. At the time of writing, works are on target to be completed within the 12 week timeline estimated.

ITEMS COSTING BETWEEN £5,000 AND £30,000

56. The following items of expenditure have been authorised by officers under delegated powers within the band range of £5,000 to £30,000 since the last Authority meeting:-

Choice Computing – Cloud Hosting and Computer Systems

£12,275

COMMENTS OF THE TREASURER

57. The matters outlined in this report can be met from within existing approved 2019/20 budgets or reserves, including £30,000 RWR underspend carried forward from 2018/19 which has been requested for approval in the outturn paper elsewhere on this agenda.

RECOMMENDATIONS

- 58. The Authority is recommended to:
 - (a) authorise officers to commission an Authority-wide waste composition survey every 15 months at an estimated cost of £16,000 per annum (see paragraphs 34 to 35 above);
 - (b) approve the proposed procurement process for the services outlined in paragraphs 36-45 above;
 - (c) indicate if they agree that a visit to the Smugglers Way MRF is desired (see paragraphs 51-54 above); and

(d) otherwise receive this report as information.

M. Broxup GENERAL MANAGER

Western Riverside Transfer Station Smugglers Way Wandsworth SW18 1JS.
