## Paper No. WRWA **20-25**

## **WESTERN RIVERSIDE WASTE AUTHORITY**

MEETING	11 <sup>th</sup> November 2020				
REPORT AUTHOR/DATE		General Manager (Contact Mark Broxup - Tel. 020 8871 2788)  3 <sup>rd</sup> November 2020			
SUBJECT	A Report outlining progress with operations and other matters since the previous meeting of the Authority.				
CONTENTS	Page 1 Pages 1 to 12 Page 12 Pages 13- 22 Page 23 Pages 24 - 26	Executive Summary  Items reported on  Recommendations  Appendix A – Performance Monitoring  Appendix B – Education Programme leaflet  Appendix C – Draft WRWA response to  Government consultation on Ecodesign and Energy Labelling Regulations for 2021			
STATUS	Open				
BACKGROUND PAPERS	None				

#### **EXECUTIVE SUMMARY**

- 1. This paper brings Members up to date on operational and other matters, which, in themselves, do not warrant the production of a separate paper. The majority of these matters are for Members' information, but where approval is sought this is referred to in the report and summarised at the end. The specific matters covered in this report are:
  - a) Operations
  - b) Booking System Update
  - c) Performance Monitoring
  - d) Education Programme
  - e) WRWA Communications
  - f) Environment Bill
  - g) Consultation on draft Ecodesign and Energy Labelling Regulations for 2021
  - h) Take Charge +
  - i) Brexit Transition
  - j) Riverside Energy Park
  - k) Constituent Council New Recycling Initiatives
  - I) Clerk to the Authority
  - m) items costing between £5,000 and £30,00

#### **OPERATIONS**

2. There has been no major disruption in service to the main Transfer Stations' operations since the last Authority meeting.

#### **BOOKING SYSTEMS UPDATE**

- 3. At the last Authority meeting it was agreed to introduce a booking system trial at the HWRC for a six-month period, from 1<sup>st</sup> February 2021. A procurement process has commenced seeking proposals to provide a booking system for an initial trial period of six months. The deadline for submissions is 12<sup>th</sup> November 2020.
- 4. Assuming the procurement process is successful and officers are confident a compliant system can be delivered in the timescale, then it is planned to commence a communications plan in late December 2020 / early January 2021 to inform residents about the introduction of the booking system. The following will be used to convey the message:

- Leaflets will be handed out at the HWRC
- Electronic signage at the HWRC
- Social Media Nextdoor and Twitter
- Paid for advertising on Facebook
- The Authority's website and Borough websites
- Full page adverts will be placed in local publications.

#### **PERFORMANCE MONITORING**

#### Introduction

- 5. Detailed tonnage tables are attached as Appendix A to this report. The tables shown set out:
  - a) the tonnages of each waste type (including co-mingled recycling contamination) delivered by each constituent council in the current financial year to date, together with projected outturn tonnages, compared against those budgeted for and the previous financial year's outturn;
  - b) the projected annual cost for each commodity, compared to what these would be if the Authority's budgeted tonnage of each commodity was received;
  - c) forecast tonnages for future years, adjusted simply by the number of working days in each year; the major waste type and co-mingled contamination tonnages are also shown on a monthly as well as an annual basis; and
  - d) comparisons of the tonnage of each major waste type handled by each constituent council on an annual basis.

#### **Points to Highlight**

- 6. Whilst General Waste (the residual waste that cannot be reused or recycled and is sent for energy recovery) accounts for around 76% of the delivered waste stream, it accounts for almost 93% of the Authority's waste disposal costs after allowing for the treatment of the contamination within the co-mingled recycling. By comparison co-mingled recycling represents 19% of the delivered tonnage, but only accounts for 4% of the Authority's costs.
- 7. From tonnage data to date we are predicting a 2.18% reduction in total waste handled by the Authority in 2020/21 from that budgeted for and a 2.96% decrease in General Waste. All the predictions are based on the actual tonnage

- up until 30<sup>th</sup> September 2020 and are distorted due to the impact on Covid-19 on the tonnages during the first quarter of 2020/21.
- 8. The predictions for General Waste vary significantly across the constituent councils; decreases are predicted for Hammersmith & Fulham at 0.97% and Kensington and Chelsea at 22.8%. Lambeth has a predicted increase of 2.04% and Wandsworth of 9.58%. The loss of commercial waste in Kensington and Chelsea has impacted significantly and the effect of the lockdown, with more residents being at home, has caused a significant increase in household waste in Wandsworth. Hammersmith & Fulham and Lambeth tonnages appear to have balanced out due to the reductions in the amount of commercial waste collected, but with increases in household waste due to more residents being at home.
- 9. The predicted tonnages of co-mingled recycling also vary significantly across the four boroughs, with increases for Hammersmith & Fulham at 5.7%, Lambeth at 13.81% and Wandsworth at 14.74%. Kensington and Chelsea, however, is currently forecast to have a decrease of 23.85%.
- 10. The forecast for the Household Waste and Recycling Centre is distorted because of the closure of the facility in April and May 2020 due to the lockdown and currently predicts a reduction in total waste of 12.68% and a reduction in General Waste of 9.58%.

#### **EDUCATION PROGRAMME**

- 11. Since the last Authority meeting the Education Programme has carried out a number of socially distanced outdoor workshops, but as Autumn advanced these were no longer considered viable due to the unreliability of the weather. The Education Team are now offering online workshops to schools via several online platforms and the online flier attached as Appendix B for Members' information details the workshops offered for the different curriculum based key stages.
- 12. Schools are being contacted individually to encourage them to use these resources. The response has been fair and it is hoped that the take up will improve as the schools settle into their new ways of working due to Covid 19 requirements.
- 13. Adult online tours of the MRF and transfer station are also being offered and are being promoted on the Authority's website and via the Borough websites.

14. The table below details the workshops that, at the time of writing, have either been carried out online or are booked in to happen during the Autumn term.

Borough	Name of school/ed. establishment	Date	Total No. of workshops	Assembly
			<u>23</u>	<u>3</u>
Wandsworth	All Saints	07/10/2020	4	
Wandsworth	All Saints	08/10/2020	5

#### WRWA COMMUNICATIONS

#### Communications plan – Financial year 2020/2021

- 16. At the Authority meeting on 23<sup>rd</sup> January 2020 (Paper WRWA 20-05) it was agreed that, from 1<sup>st</sup> April 2020, the Authority should run its own communications campaigns on areas directly affecting the Authority's business and continue to manage two existing campaigns; namely, 'What Happens to your Recycling' and the 'End of the Line for Waste' reduction campaign online, via social media and at the Household Waste and Recycling Centre (HWRC).
- 17. With the onset of Covid-19 and the introduction of the lockdown resulting in the closure and reopening of the HWRC the Authority's priorities changed and it focussed on communicating the reopening of the HWRC and the social distancing requirements.
- 18. Other activities that the Authority's website and social media platforms have supported are Recycle Week (20-27 September 2020) and London Repair Week (12-17 October 2020) and we will also be supporting the 'Take Charge +' battery fire awareness campaign that starts week commencing 26<sup>th</sup> October 2020 (see paragraphs 33 to 37 below).
- 19. With effect from Monday, 2<sup>nd</sup> November 2020, the Authority will carry on again with the two core campaigns promoting 'What Happens to your Recycling' and the 'End of the Line for Waste' reduction campaign. However it was planned that face to face engagements would be carried out on the HWRC, employing personnel to talk to residents to encourage them to reduce waste and to reuse and maximise recycling, but due to social distancing that has not been possible and is unlikely for the foreseeable future.
- 20. The Booking System trial communications plan will also be resourced from this financial year's budget and will commence in late December 2020, or early January 2021, to provide a long lead in time for the start of the trial in February 2021, at an estimated cost of £5,000.

#### Communications plan – Financial year 2021/2022

21. It is proposed to continue with the two core campaigns in Financial Year 2021/22 using social media and to focus attention on increasing Reuse and Recycling at the HWRC as detailed overleaf.

22. It is also proposed to keep in place a £25,000 budget for any campaigns that may be appropriate to the Government's plans to introduce new waste management legislation covering matters such as compulsory food and garden waste collections, a deposit return scheme and extended producer responsibility for packaging. This budget, if required, will be funded from the Recycling Reserve which currently has a balance of £250,000.

Work Stream	Annual Budget	New Waste Management Requirements Budget, if required	Total
Social Media advertising – using paid-for targeted posts (by location) on Facebook, Instagram and Twitter	£5,000		
A design budget for all electronic adverts, posts and communications material at the HWRC	£10,000		
Communications relating to increasing Reuse and Recycling at the HWRC.	£5,000		
A budget for any new Waste Management requirements, if required for innovation, special projects or new engagement methods.		£25,000	
Total	£20,000	£25,000	£45,000

23. Members are requested to approve the proposed communications budget for Financial year 2021/21, which provides a reduction of £5,000 when compared to Financial year 2020/21 budget due to social distancing requirements not permitting face to face engagement at the HWRC.

#### **ENVIRONMENT BILL 2019-2021**

- 24. The Environment Bill 2019-2021 was being considered by a Public Bill Committee but, due to current circumstances, the sittings of the Committee have been suspended until further notice. The Committee is now scheduled to report by Tuesday, 1<sup>st</sup> December 2020.
- 25. As instructed by the Authority (Paper No WRWA 20-14), on 26<sup>th</sup> August 2020 officers submitted to the Public Bill Committee evidence in respect of the Environment Bill 2019-20, highlighting that the Bill does not address what the terms 'recycling' and 'recyclable' mean and associated issues with Section 48(2) of the Environmental Protection Act 1990. Further information on the progress of the Bill is available <a href="here">here</a>.

## CONSULTATION ON DRAFT ECODESIGN AND ENERGY LABELLING REGULATIONS FOR 2021

- 26. The Government is consulting on the draft Ecodesign for Energy-Related Products and Energy Information Regulations 2021 that was published on 30<sup>th</sup> September 2020 and the closing date is 11<sup>th</sup> November 2020, at 11.45pm. The Regulations are to be made under the two separate powers:
  - Ecodesign powers which will exist in the Ecodesign for Energy-Related Products Regulations 2010, as amended by the Ecodesign for Energy-Related Products and Energy Information (Amendment) (EU Exit)
     Regulations 2019 at the end of the Transition Period; and
  - Energy Labelling powers which will exist in the retained Energy Labelling
    Framework Regulation (EU) 2017/1369, as amended by the Ecodesign for
    Energy-Related Products and Energy Information (Amendment) (EU Exit)
    Regulations 2019 at the end of the Transition Period. These Regulations
    require the Secretary of State to consult on new product-specific
    regulations and the associated Impact Assessment. This is what this
    consultation document does.
- 27. The draft regulations published as part of this consultation relate to seven products. These are:
  - Electric motors and variable speed drives ("electric motors");
  - Electrical mains-operated welding equipment ("welding equipment");
  - Household washing machines/washer-dryers;
  - Household dishwashers;
  - Refrigerating appliances ("household refrigeration");
  - Refrigerating appliances with a direct sales function ("commercial refrigeration"); and
  - Electronic displays.

#### 28. The draft regulations are intended to:

- a) update existing ecodesign requirements for electric motors, household washing machines/washer-dryers, household dishwashers, electronic displays, and household refrigeration;
- b) introduce new ecodesign requirements for welding equipment and commercial refrigeration; and
- c) introduce new energy labelling requirements for commercial refrigeration.

- 29. Some of the requirements take effect before the end of the Brexit Transition Period and will be saved in UK law from 1<sup>st</sup> January 2021, whereas those due to come into force in 2021 require the Government to introduce specific legislation to ensure that Great Britain realises the associated benefits.
- 30. The proposed draft regulations reflect what the UK voted for as a Member State and the Government's support was affirmed by carrying out cost-benefit analysis and engagement with UK interested parties.
- 31. Through the draft regulations proposed in this consultation, the Government's expects 15.8 TWh of electricity savings by 2050 in the domestic sector, which is the equivalent of up to a £3 billion reduction on household energy bills. This will also result in around 1.3 MtCO2 of Carbon Savings for the same period.

#### Authority response to the consultation

32. The Authority is asked to endorse the response to the consultation (see Appendix C to this report), which Officers will have submitted with a note explaining that it is subject to approval. The response, which deals with the areas in the consultation relevant to the Authority's remit, supports the draft regulations, particularly those that relate to the Ecodesign of household appliances that aims to ensure electrical products last longer as they can be more easily repairable and are specifically designed to be to recyclable thus reducing waste.

#### **TAKE CHARGE +**

- 33. It is estimated that lithium-ion or other high-energy rechargeable batteries that have been improperly disposed of by consumers cause over a quarter of all fires at waste management facilities.
- 34. All batteries should either be recycled separately to other waste, or embedded in Waste Electrical and Electronic Equipment (WEEE). When they are not recycled separately by the consumer they are likely to be subject to compaction or shredding and exposed to heat and water, which can lead to short-circuiting and create a source of ignition which, in the presence of other waste as fuel, leads to large fires, damage to property and an endangerment to lives.
- 35. To help combat this, the Environment Services Association (ESA) launched its 'TAKE CHARGE +' campaign, on 26<sup>th</sup> October 2020, in which it is urging consumers

- to 'Take Charge and Recycle Batteries Responsibly' by depositing all their batteries in the correct recycling stream.
- 36. The ESA anticipates that to achieve meaningful, long-term, results a sustained multiphase campaign will be required. The purpose of this first phase is simply to:
  - a) raise awareness of the issue primarily among older children, teenagers and younger adults;
  - b) raise awareness of the different types of batteries contained in various product types;
  - c) provide consumers with access to clear and factual information to empower them to make the right choices; and
  - d) provide stakeholders, particularly local authorities, with quality information to share with their audiences.
- 37. The Authority is supporting the campaign by using the free resources supplied by the ESA in its online communications and advertising.

#### **BREXIT TRANSITION**

- 38. When the UK left the EU on 31<sup>st</sup> January 2020, it entered a transition period (sometimes described as the "implementation period"). This period allows the UK to continue its current relationship with the EU while the future trading relationship and security co-operation is negotiated.
- 39. The transition period is due to expire on 31<sup>st</sup> December 2020, when the UK's relationship with the EU will be determined by the new agreements it has entered into on trade and other areas of co-operation. If no deal is reached, the UK would have to rely on previous international conventions for security co-operation and would trade with the EU on World Trade Organization terms.
- 40. Therefore there is a risk that, in early in 2021, recycling markets, the value of recyclables and the ability to transport goods generally, including recyclable materials, across the channel could be disrupted to a lesser or greater degree depending upon the agreements that are, or are not, negotiated during the remainder of 2020.

- 41. In particular, there is a fear that HGV vehicles without the correct documentation will be stopped from boarding ferries, or on arrival at an EU port, and this will cause knock-on delays for all HGV vehicles. If there are delays, it is also possible that priority will be given to perishable food goods, medicines and Covid-19 related equipment and therefore exporting recyclables may become difficult, at least in the short term.
- 42. Cory Riverside Energy currently export some glass, paper, cardboard and aluminium cans to EU countries and, in preparation for no new trade agreements being in place, Cory is putting a number of contingency options in place including plans for additional storage capacity, contingency outlets and options for alternative haulage arrangements. In addition to this they are working closely with all of their European outlets to ensure that they have the required paperwork in place for 1st January 2021.

#### **RIVERSIDE ENERGY PARK (REP)**

- 43. On 9<sup>th</sup> April 2020 the Secretary of State for Business, Energy and Industrial Strategy, Alok Sharma, granted a Development Consent Order (**DCO**) to Cory Riverside Energy (**CRE**) for a Riverside Energy Park (**REP**), to be located alongside the existing Energy from Waste plant operated by Riverside Resource Recovery Ltd. (a CRE group company) in the London Borough of Bexley.
- 44. The Mayor of London, Sadiq Khan, initiated plans to contest the Secretary of State's decision and, on 21<sup>st</sup> May 2020, he submitted an application to the High Court for a Judicial Review which was granted on 7<sup>th</sup> June 2020. However, on 1<sup>st</sup> October 2020, the Mayor decided to withdraw his application and the DCO has therefore come into force.

#### **CONSTITUENT COUNCIL RECYCLING INTIATIVES**

45. At the meeting of the Authority on 22<sup>nd</sup> September 2010 (Paper No. WRWA 669A) Members instructed the Clerk to write to each of the constituent councils to inform them that, in future, should they wish to make arrangements themselves to recycle any significant tonnage of waste then, in accordance with Section 48 of the Environment Protection Act 1990, they must, as soon as reasonably practicable, notify the Authority in writing. The Authority will then approve or object to any such proposal at its next available meeting. The Clerk wrote to the constituent councils, as instructed, on 27<sup>th</sup> October 2010.

- 46. On 6<sup>th</sup> October 2020 Hammersmith & Fulham Council notified the Authority of its intention to separately trial a separate food waste collection service for its residents, involving approximately 6,000 kerbside properties, from November 2020. It is estimated that the trial will generate around 250 to 450 tonnes of food waste per year. In line with decisions made by the Authority at its meeting in June 2020 (Paper No. WRWA 20-14) officers confirmed the Authority's approval for the trial.
- 47. The General Manager wrote to CRE on 13<sup>th</sup> October 2020 seeking their approval and CRE replied by letter on 19<sup>th</sup> October 2020 confirming that, providing the food waste is being separately collected from the General Waste (not extracted from the General Waste stream via third party sorting/processing) and on the basis that current research still shows that Anaerobic Digestion is environmentally superior to composting and other recovery options (including Energy from Waste), Cory Riverside Energy will support the trial, in principle, but would need to be informed if the proposed tonnages for the food waste trial were to change to ensure that they can plan for tonnage fluctuations at the Energy from Waste Facility in Belvedere in the short or longer term.

#### **CLERK TO THE AUTHORITY**

- 48. At its meeting in September 2020 (Paper No. WRWA 20-23) the Authority agreed to interview Mr. Bayo Dosunmu, Lambeth Council's Strategic Director Resident Services (Deputy Chief Executive), for the position of Clerk effective from 1<sup>st</sup> April 2021. The appointments committee met on 20<sup>th</sup> October 2020 (Paper No. WRWA 20-24) and, after due deliberation and subject to receipt of satisfactory references, Mr Dosunmu was appointed.
- 49. Mr. Dosunmu has held his current role at Lambeth Council since February 2019 and prior to that he held senior positions at Homes England, the UK Civil Service and the 2012 Olympic Delivery Authority.

#### ITEMS COSTING BETWEEN £5,000 AND £30,000

50. There have been no items of expenditure that have been authorised by officers under delegated powers that fall within the band range of £5,000 to £30,000 since the last Authority meeting.

#### **COMMENTS OF THE TREASURER**

- 51. Constituent councils are reminded to make their own assumptions in relation to tonnage levels and that the information at the beginning of this report will assist them in doing so.
- 52. If the revised communications budget is approved, this will generate an annual saving of £5,000 which will be incorporated in the annual budget and levy setting paper in January.

#### **RECOMMENDATIONS**

- 53. It is recommended that the Authority approves:
  - a) the proposed communications budget for Financial year 2021/21, as detailed in paragraphs 21 to 23 above;
  - b) the WRWA response to the Government's draft Ecodesign and Energy Labelling Regulations for 2021, as detailed in Appendix C to this report; and

c)	otherwise receives this report as information.

In-school

Or online

# Reduce, reuse, recycle

# Waste Education Programme for Schools [Covid-secure Risk Assessment available]

We deliver FREE, curriculum linked workshops, assemblies in your school, to encourage pupils and staff to REDUCE, REUSE, RECYCLE (the 3 R's).

We are flexible about how to run our workshops. Please talk to us about what suits your school.

### Workshops amended for Autumn term

#### **EYFS**

**Another Fine Mess:** start finding out about waste and recycling with Mr Fox, and make a recycled fox puppet/bookmark. (30mins)

#### KS1

**Michael Recycle:** what can you do to be a recycling superhero? Plus colour in your own superhero and help save the earth. (30mins)

#### KS2

**Plastic Planet:** just how big is our problem with plastic? Find out where our plastic waste ends up, how it is affecting our planet and what actions we can take. (40mins)

Perhaps we could accompany you on a walk in the park and deliver our 3R's message along the way. Using litter (safely) to illustrate the types of materials that get thrown away every day, their impact on the planet, and how we can reduce, reuse or recycle to help alleviate the problem.

Or perhaps in the park?

For schools in Lambeth, Wandsworth, Kensington & Chelsea and Hammersmith & Fulham

020 8875 8887 : education@wrwa.gov.uk wrwa.gov.uk/\$2hools

The Department for Business, Energy and Industrial Strategy – Consultation on the Ecodesign for Energy-Related Products and Energy Information Regulations 2021 – WRWA response

The Authority fully supports the intentions of the Ecodesign for Energy-Related Products and Energy Information Regulations 2021 which will result in significant carbon savings. The Authority is responsible for waste management it is therefore particularly supportive of the Ecodesign measures for household products that will ensure that the product design is such that products have increased durability, reparability, recyclability and will facilitate material recovery which will result in the reduction of waste.

**Question 22** Do you agree with our intention to introduce, in the draft regulations, new eco-design requirements for household washing machines/washer-dryers in GB to reflect what the UK agreed at EU level as a Member State in January 2019? If you do not agree, please provide reasons supported by evidence where possible.

Yes.

**Question 23** Do you agree with our intention to implement new GB ecodesign requirements for household washing machines/washer-dryers from March 2021 reflecting what the UK agreed at EU level as a Member State in January 2019?

Yes.

**Question 24** Do you agree that March 2021 is an achievable implementation date for new ecodesign requirements for household washing machines/washer-dryers for small and micro businesses? If you do not agree, what support or allowances could be given to small and micro businesses to help them meet this implementation date?

Yes.

**Question 25** Do you agree with our intention, as set out in the draft regulations in respect of household washing machines/washer-dryers, to review the regulations 7 years from their date of application? If you do not agree, please provide reasons supported by evidence where possible.

Yes.

**Question 33** Do you agree with our intention to introduce, in the draft regulations, new eco-design requirements for household dishwashers in GB to reflect what the UK agreed at EU level as a Member State in January 2019? If you do not agree, please provide reasons supported by evidence where possible.

Yes.

**Question 34** Do you agree with our intention to implement the new GB ecodesign requirements for household dishwashers from March 2021 reflecting what the UK agreed at EU level as a Member State in January 2019?

Yes.

**Question 35** Do you agree that March 2021 is an achievable implementation date for new ecodesign requirements for household dishwashers small and micro businesses? If you do not agree, what support or allowances could be given to small and micro businesses to help them meet this implementation date?

Yes.

**Question 36** Do you agree with our intention, as set out in the draft regulations in respect of household dishwashers, to review the regulations 7 years from their date of application? If you do not agree, please provide reasons supported by evidence where possible.

Yes.

**Question 44** Do you agree with our intention to introduce, in the draft regulations, new eco-design requirements for household refrigeration in GB to reflect what the UK agreed at EU level as a Member State in December 2018? If you do not agree, please provide reasons supported by evidence where possible.

Yes.

**Question 45** Do you agree with our intention to implement the new GB ecodesign requirements for household refrigeration from March 2021 reflecting what the UK agreed at EU level as a Member State in December 2018?

Yes.

**Question 46** Do you agree that March 2021 is an achievable implementation date for new ecodesign requirements for household refrigeration for small and micro businesses? If you do not agree, what support or allowances could be given to small and micro businesses to help them meet this implementation date?

Yes.

**Question 47** Do you agree with our intention, as set out in the draft regulations in respect of household refrigeration, to review the regulations 7 years from their date of application? If you do not agree, please provide reasons supported by evidence where possible.

Yes.

**Question 67** Do you agree with our intention to introduce, in the draft regulations, new eco-design requirements for electronic displays in GB to reflect what the UK agreed at EU level as a Member State in December 2018? If you do not agree, please provide reasons supported by evidence where possible.

Yes.

**Question 68** Do you agree with our intention to implement the proposed GB ecodesign requirements for electronic displays from March 2021 reflecting what the UK agreed at EU level as a Member State in December 2018?

Yes.

**Question 69** Do you agree that March 2021 is an achievable implementation date for new ecodesign and energy labelling requirements for electronic displays for small and micro businesses? If you do not agree, what support or allowances could be given to small and micro businesses to help them meet this implementation date?

Yes.

**Question 70** Do you agree with our intention, as set out in the draft regulations in respect of electronic displays, to review the regulations 3 years from their date of application? If you do not agree, please provide reasons supported by evidence where possible.

Yes.
